

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	29 June 2026
Project Name	Automated Network Request Management System
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 🕒 10 minutes to prepare
- 🕒 1 hour to collaborate
- 👥 2-5 team members

Project

Network Request Management System (ServiceNow)

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering

- Gather project team members.
- Discuss the current network request process.
- Share project objectives and expectations.

B Set the goal

- Focus on solving delays in network request submission, approval and fulfillment.
- Improve user experience and transparency using ServiceNow.

C Learn the current process

- Understand how network requests are submitted and approved currently.
- Identify pain points, bottlenecks and gaps.
- Explore how ServiceNow can automate and simplify the process.

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM STATEMENT

How might we simplify and automate the Network Request Management process so that employees can submit requests, managers can approve them quickly, and the IT team can efficiently track and fulfill requests?

Key rules of brainstorming

To run a smooth and productive session

 Stay focused on the problem.

 Encourage innovative ideas.

 Defer judgment.

 Listen to every team member.

 Go for volume.

 Prioritize useful and practical ideas.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm & Idea Prioritization

Project: ServiceNow – Network Request Management System

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

⌚ 10 minutes to prepare
⌚ 1 hour to collaborate
👥 2 – 5 team members

➔ Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

A Team gathering

- Invite team members and stakeholders.
- Share information about the current network request process and challenges.

B Set the goal

- Focus on improving the network request process using ServiceNow.
- Generate as many ideas as possible.

C Learn the current process

- Understand how requests are raised, approved and fulfilled today.
- Identify pain points, bottlenecks and improvement areas.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

PROBLEM STATEMENT

How might we simplify and automate the Network Request Management process so that employees can submit requests easily, managers can approve quickly, and the IT team can efficiently track and fulfill requests?

Key rules of brainstorming
To run a smooth and productive session

😊 Stay focused on the problem.

⌚ Defer judgment.

🗣️ Go for volume.

💡 Encourage wild ideas.

👂 Listen to others.

👁️ If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

TIP Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer heading the key on the keyboard.

Regardless of their importance, which tasks are more feasible than others? (cost, time, effort, complexity, etc.)
