Customer Problem Statement

Customer: Employee requesting a network service.

Problem

Employees often face delays and lack of clarity while submitting network service requests because the process is handled manually through emails or phone calls. There is no centralized tracking system, approval workflow, or request status visibility, which leads to delayed service delivery and ineffective communication.

Need

A centralized **ServiceNow-based Network Request Management System** that enables employees to submit network requests online, automatically forwards requests for manager approval, tracks request progress, sends notifications, and maintains complete request records.

Expected Outcome

An efficient, transparent, and automated network request process that minimizes manual effort, speeds up approvals, improves communication, and allows users to track their requests from submission until completion.

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	I am an employee in the organization who needs network services such as internet access, VPN, firewall changes, or new network connections to perform my daily work.
I'm trying to	List their outcome or "job" the care about - <i>what are they trying to achieve?</i>	I'm trying to request the required network service quickly and get approval from my manager so I can access the network resources I need without delays.
but	Describe what problems or barriers stand in the way – <i>what bothers them most?</i>	But the current process is manual, slow, and unclear. I have to send emails or follow up multiple times, and I cannot track the status of my request.
because	Enter the "root cause" of why the problem or barrier exists – <i>what needs to be solved?</i>	Because there is no centralized system to submit, approve, and track network requests. The process depends on manual communication and lacks automation and transparency.
which makes me feel	Describe the emotions from the customer's point of view – <i>how does it impact them emotionally?</i>	Which makes me feel frustrated and anxious due to delays and uncertainty. It affects my productivity and the timely completion of my work.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am an employee who needs network services to perform my daily work.	I'm trying to submit a network service request and get quick manager approval.	But the approval process is slow and I cannot track my request status.	Because the existing process is manual and lacks automation.	Frustrated and worried about delays in completing my work.
PS-2	I am an IT user requesting VPN, internet, or network access.	I'm trying to receive network access quickly through an easy process.	But I have to wait for approvals and manually follow up with the IT team.	Because there is no centralized system for request tracking and notifications.	Dissatisfied due to delays and lack of transparency in the process.
