

Ideation Phase Empathize & Discover

Date	29 June 2026
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas

An **Empathy Map** is a simple visual tool used to understand the thoughts, needs, feelings, and behaviors of users who request network services through the Service Now portal. It helps identify common challenges, such as delays in the approval process and the absence of proper request tracking. Based on these insights, an automated approval workflow can be developed to provide faster request processing, real-time status updates, and a better overall user experience.
