

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	29 June 2026
Project Name	Automated Network Request Management System
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Request Submission	Submit Network Request through Service Catalog
		Capture request details using catalog variables
FR-2	Request Creation	Create record in Network Database table
		Generate unique Request Number
FR-3	Request Assignment	Assign request to Network Engineer
		Assign based on Assignment Group
FR-4	Approval Management	Send approval request to Manager
		Manager can Approve or Reject request
FR-5	Request Processing	Update Work Status (New, In Progress, Completed)
		Store approval and assignment details
FR-6	Notifications	Send email to Requester, Manager and Assignee
		Notify on Approval, Rejection and Completion

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple Service Portal interface that is easy for users to submit and track network requests.
NFR-2	Security	Role-based access control to ensure only authorized users can create, approve, assign and update requests.

NFR No.	Non-Functional Requirement	Description
NFR-3	Reliability	The system should accurately store request information and execute workflows without data loss.
NFR-4	Performance	Network requests should be created, assigned and processed with minimal response time.
NFR-5	Availability	The application should be available 24×7 for request submission and tracking.
